Communicator built & operated by  
BSEWebsites.com**

## Builder Communicator

Handle "Change Orders" with ease. Enjoy a private photo gallery that only you and your customer can access on the Internet. Have a private two way communication portal that retains both sides of the conversation between you and your customers. There is a library of "PDF" documents from your contracts to color selections and beyond. Keep up your project's schedule in real time with the built

in "Calendar" feature. The Builder Communicator is the perfect place to go for handling the customer's color selections on-line. These are all tools at your fingertips from any computer that is tied to the Internet. The Builder Communicator from BSEwebsites.com offers all this and more!

Enjoy a private photo gallery that only you and your customer can access on the Internet. Let your customer see progress on the construction of their house whether they are in town or not. The builder simply uploads photos they have taken in the field through their password protected backdoor. The builder can also divide these photos into different groups called Categories, like Plumbing, Brick, Dry In, etc.

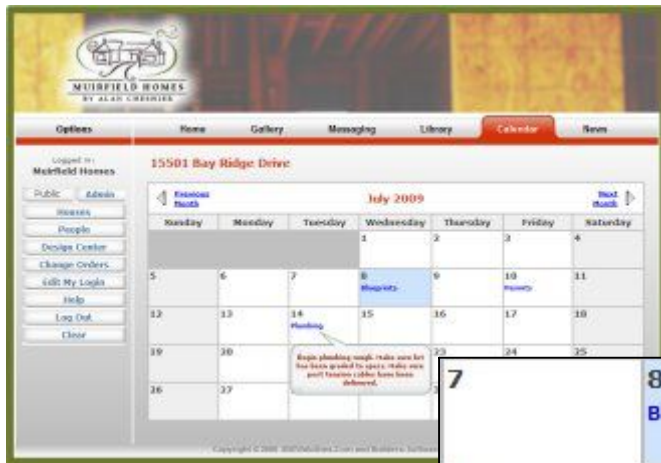

Have a private two way communication portal that retains both sides of the conversation between you and your customers. Back & forth conversation in the Builder Communicator are called Threads. Instead of "He said, she said", you have a record of all the emails pertaining to this project. The system will notify you & your customer's e-mail address when you

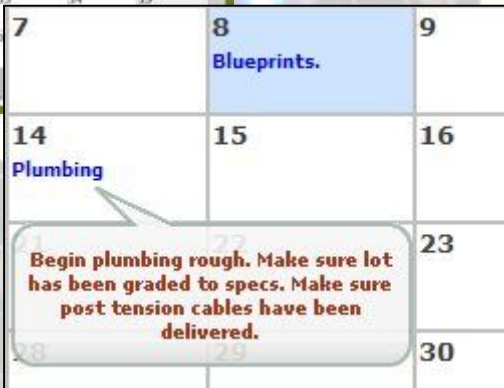

have business to pay attention to inside the Builder Communicator. A link from this e-mail to the Builder Communicator is also provided for your convenience.

There is a library of "PDF" documents from your contracts to color selections and beyond. Any form that you create into a PDF can be uploaded through your back door. The customer can pull up their deed restrictions in the middle of the night & never disturb you in the process. Making a document into a PDF is a very simple procedure and the software to accomplish this task is on-line & it's free!

Keep up your project's schedule in real time with the built in "Calendar" feature. Run your project from any computer that has an Internet connection.

Handle "Change Orders" with ease. Get an on-line approval from your customer with the date & time stamp of when they approved the Change Order, as well as, the IP Address from the computer they were using at the time they approved the Change Order. You & your customer can print out a nice hard copy for your records. Where you are at on your Change Orders will only be a mouse click away.

***Here is the Cost structure for the Builder Communicator:***
